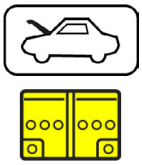
Suitable lifting points

3. Disable direct hazards / safety regulations

Switching off the ignition

Press the "Engine Start/Stop" button in the centre console without engaging the brake pedal.

Keep the vehicle key, key card and/or smartphone with the app at least five metres away from the vehicle wherever possible.



Disconnecting the 12-volt battery

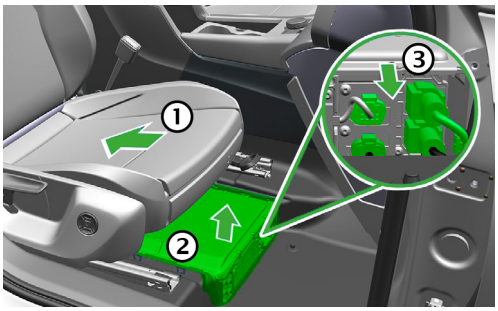
In the engine compartment
Disconnect the negative battery terminal

Li-ion

Disconnecting the 48-volt battery

In the event of accidents where the airbag is deployed, the 48-volt vehicle electrical system will be deactivated automatically as soon as airbag deployment has been detected.

For all other cases, the 48-volt vehicle electrical system can be deactivated as follows:



① Move the right seat all the way back

② Remove the battery cover in the footwell on the right-hand side of the vehicle

③ Unplug all connectors

4. Access to the occupants
